Action List

GREATER DELIVERY RELIABILITY AND OVERVIEW OF THE SUPPLY CHAIN

Wouldn't it be nice if your staff could get a quick overview of their tasks for the day? A tool that allowed them to be one step ahead, proactive and with a comprehensive overview of the supply chain across the organization? Action List lets them do just that.

Action List is a tool that brings delayed activities and other activities requiring attention to the forefront in an easy and transparent way. It helps staff to get their work done and to avoid delays in the supply chain.

With Action List you get a quick overview of the day's tasks across the organization, substantially greater delivery reliability and consequently more satisfied customers"

Action List

Transparency in the supply chain and important financial data

Action List is a tool that brings delayed activities and other activities requiring attention – data that requires action – to the forefront. The tool helps your organization stay one step ahead, avoid delays in the supply chain and achieve greater delivery reliability.

Besides the obvious benefits, Action List is also a useful tool for individual employees, because it gives them a quick overview of their tasks for the day.

Makes the workday easier and saves time

Action List lets you mark in the system which activities you want to monitor. When you start your workday, the tasks appear as Tiles on the screen, adapted to the individual user, giving you a quick overview of the tasks that require your attention and action. This could be, for instance:

- Production or purchase orders delays
- Delayed sales lines
- Customers who owe the organization money
- Suppliers to whom the organization owes money to

## Cleans up and improves delivery reliability

In just three months, a well-known Danish organization went from disorganization to gaining total control of tasks and logistics after its employees started using Action List to clean up. Now they are one step ahead of their work, and their delivery reliability has improved significantly. You can compare Action List with Supply Chain Management at system level.

Who can use Action List?

AAction List can be purchased for and used with Microsoft Dynamics 365 Business Central and Dynamics NAV. All organizations, regardless of industry, can use Action List to get an overview of deliveries and inventory, optimize delivery reliability and, not least, improve customer satisfaction.
