

Microbizz Connector

SALES | LOGISTICS

BASIC INTEGRATION FOR CORRECT ACCOUNTING AND INVOICING OF RESOURCE CONSUMPTION

Ensures exchange of correct data

Microbizz Connector is an add-on solution that connects Microsoft Dynamics 365 Business Central and the project and task management system Microbizz.

The integration manages the exchange of data between the systems, which means you can always be sure that accounting and invoicing is executed in accordance with time consumption, goods and resources.

"The application is valuable for the project and task management module. It streamlines and optimizes the process, from the creation of tasks in Microbizz to accounting and invoicing in Dynamics 365 Business Central."

Microbizz Connector

SALES | LOGISTICS

Get an overview of your tasks knowing that accounting and invoicing is correct

Synchronization with the task management module ensures uniform handling of projects and tasks in connection with the registration of time consumed, goods and resources for a specific task. Everything you register in Microbizz is registered in 365 Business Central in the same way.

Key benefits of Microbizz Connector

- Uniform and streamlined task management
- Control and overview of status of ongoing tasks
- Ongoing accounting of costs
- Tasks are instantly ready for invoicing
- Certainty that the accounting and invoicing is correct in relation to time consumption
- Documentation and quality assurance

Efficient task management with complete control

Microbizz Connector ensures you get fast and efficient task management. An overview and a streamlined process will save you time and money.

You only need to create a task once, which means no more re-entering of data as the task progresses. Data is synchronized automatically between the systems, and you have certainty that what is registered as consumption, e.g. goods, time and resources, is actually what is invoiced.

With full control and an overview of tasks, invoicing can be completed quickly. Correct data and the certainty that everything is registered and thus transferred to Business Central, is your guarantee that invoicing is executed in accordance with actual consumption. Fast and correct invoicing means money in the bank!

Who can use Microbizz Connector?

The solution is ideal for companies that use a task management module for registering time, goods and resource consumption, and which need secure, correct and efficient accounting and invoicing of the services that they have provided.

Companies who every day set stringent requirements for planning and flexibility:

- Facility Management
- Service companies
- Builders, Contractors, Tradesmen
