# INTRODUCTION

Microbizz Connector is an add-on solution that connects Microsoft Dynamics 365 Business Central and the project and task management system Microbizz.

The integration manages the exchange of data between the systems, which means you can always be sure that accounting and invoicing is executed in accordance with time consumption, goods, and resources.

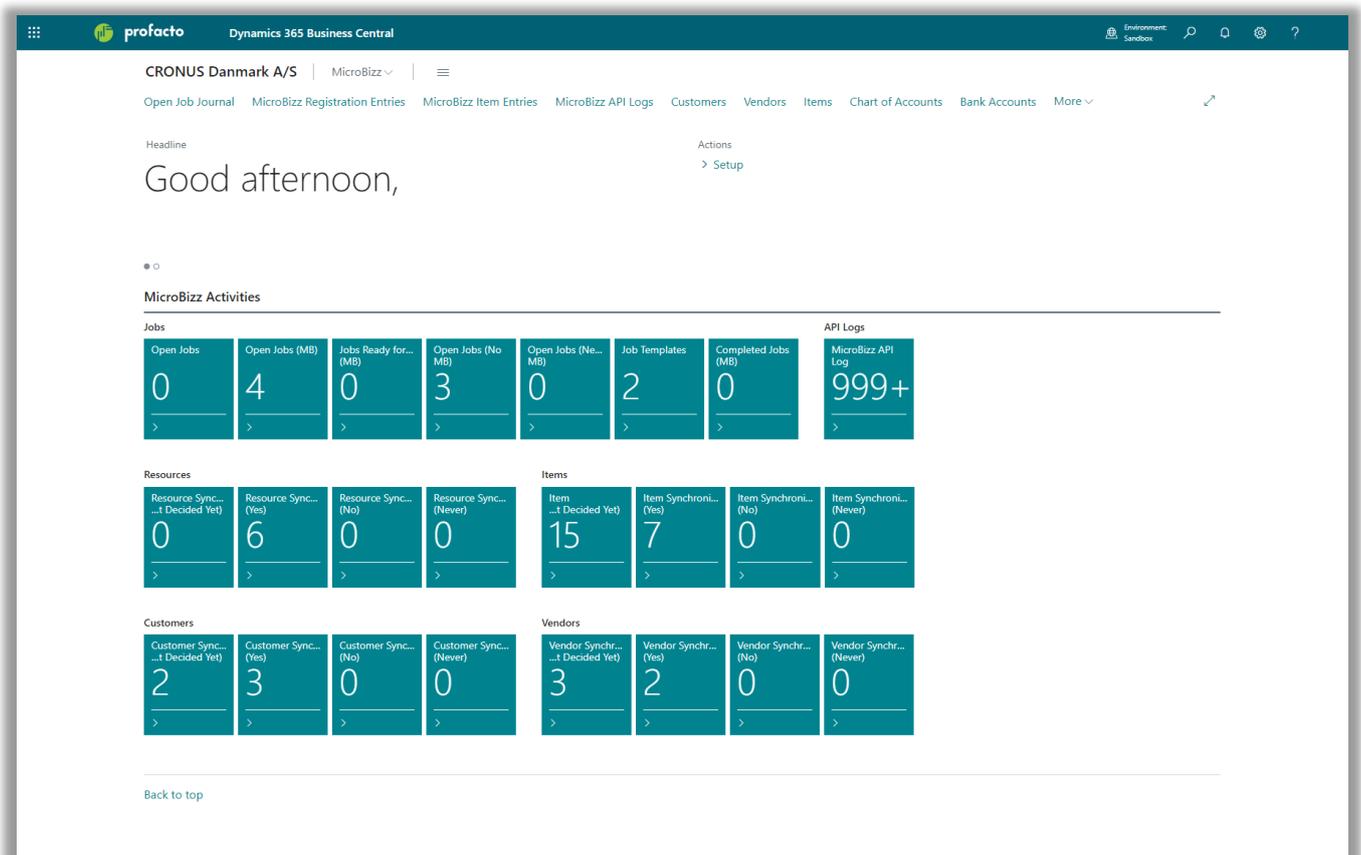

This quick guide takes you through setup for synchronization step by step.

# REQUIREMENTS

Microbizz Connector is to be installed on a Microsoft Dynamics 365 Business Central. For using the Microbizz Connector it is mandatory to have an API Key provided by Microbizz.

# MICROBIZZ ADMINISTRATOR ROLE CENTER

When setting up the Microbizz Connector it is recommended to use the Microbizz Administrator role center for best overview and access to tables to set up.

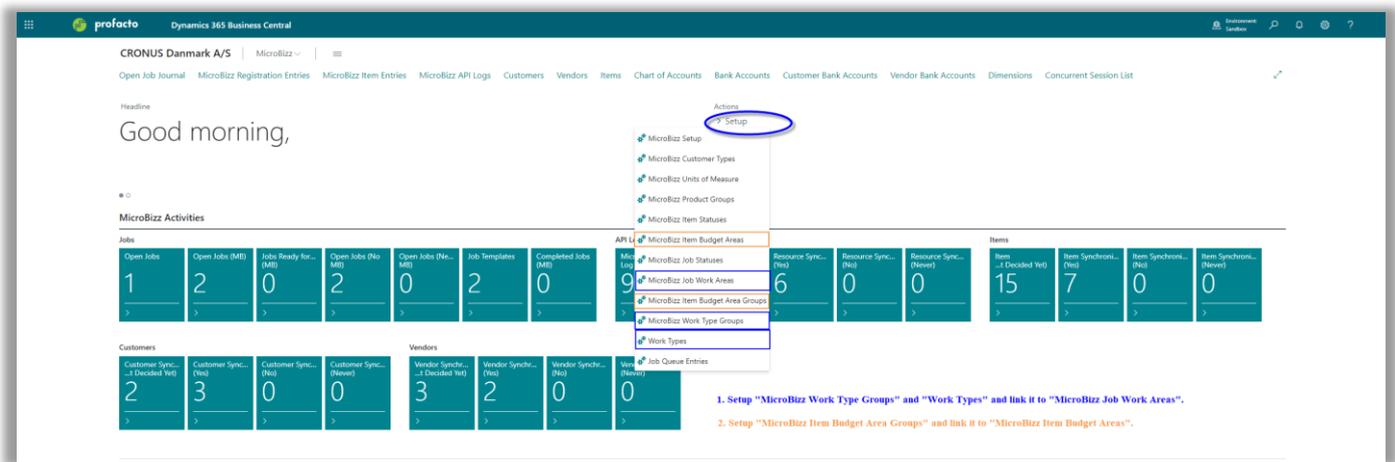

Alternative role center: The *Project Manager* role center is expanded with the Microbizz Activities group and all other Microbizz features

## CONTACT INFORMATION

ProFacto A/S | Lyfaparken | Måløv Byvej 229 G, 1 | DK-2760 Måløv

# SETTING UP MICROBIZZ

Setting up Microbizz Connector requires a few definitions in various areas all accessible from the *Setup* action in the Microbizz Administrator role center.

Most settings are automatically set up when running the *Synchronize All Setup* function.

- Set up Connection in the Microbizz Setup page.
- Run the *Synchronize All Setup* function from the Microbizz Setup page. Automatic pre-defined settings.
- Set up System Setup in the Microbizz Setup page.
- Set up Microbizz Work Type Groups
- Set up Work Types
- Set up Microbizz Item Budget Area Groups
- Set up Microbizz Customer Types
- Set up Microbizz Units of Measure
- Set up Microbizz Product Groups
- Set up Microbizz Item Statuses
- Set up Microbizz Item Budget Areas
- Set up Microbizz Job Statuses
- Set up Microbizz Job Work Areas
- Verifying setup after completed setup
- Select data to synchronize

Required settings are described in the next chapters.

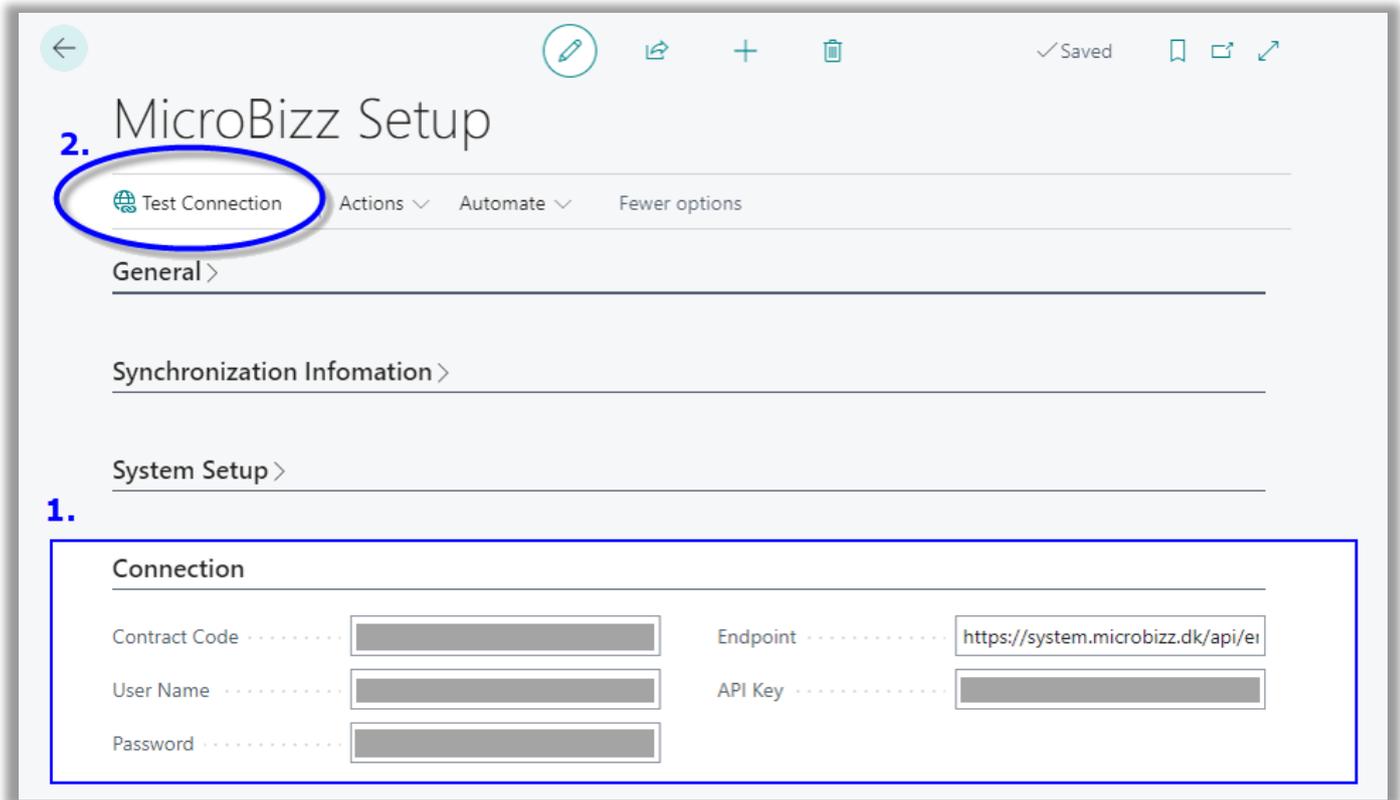

For more information see the *Microbizz Connector Manual*. This manual can be downloaded from ProFactos website [www.profacto.dk](http://www.profacto.dk).

## CONTACT INFORMATION

ProFacto A/S | Lyfaparken | Måløv Byvej 229 G, 1 | DK-2760 Måløv

## MICROBIZZ SETUP

The general Microbizz Connector setup requires definitions for communication through the Microbizz API. First, you need to set up *Connection* parameters. Second, run the Test Connection to verify

### Set up Connection

Fill in the fields in the Connection group of the Microbizz Setup page. The connection parameters defining how the connection is identified.

You are getting the required information from Microbizz after having signed an agreement with Microbizz.

### Test Connection

When the connection fields all are entered, you can test the connection using the *Test Connection* command button.

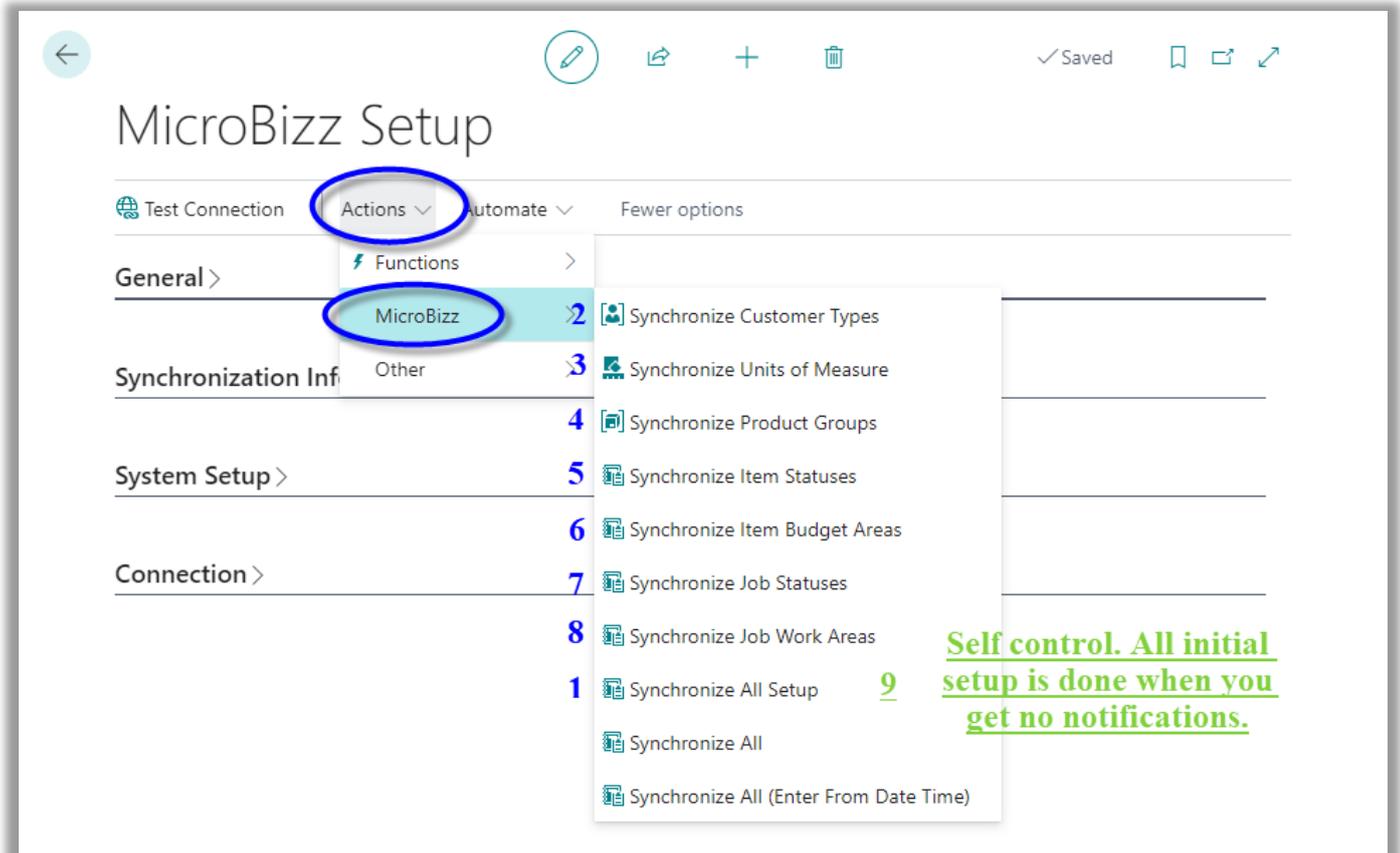

When the connection is successful, please proceed with the remaining setup, as described next. You need the connection running for getting pre-defined setup installed automatically.

#### CONTACT INFORMATION

ProFacto A/S | Lyfaparken | Måløv Byvej 229 G, 1 | DK-2760 Måløv  
+45 31 31 07 00 | info@profacto.dk | www.profacto.dk

## Synchronize All Setup

First after setting up connection please select the Synchronize All Setup. This option will fetch pre-defined values for the setup. The function is found on the Microbizz Setup page.

The figure gives an overview of the rank of the other areas to set up. The ranking by numbers indicates that you must start with the *Synchronize All Setup* function, then setting up one area after each other. The *Synchronize All Setup* is setting some pre-defined settings in most setup areas.

*Please note:*

Expect several notifications to be listed in the role center after running the *Synchronize All Setup* function.

First time the standard settings are transferred to a few setup pages. These are to be set up one by one.

Finally run the *Synchronize All Setup* again to see if any notifications are giving you a hint of missing details in the setup. When no notifications appear, the setup is complete.

### Dependencies of basic Microbizz setup

After getting the pre-defined by running *Synchronize All Setup*, start setting up the areas *Microbizz Work Type Groups* and *Work Types*. Other settings are dependent of these settings.

---

### CONTACT INFORMATION

+45 31 31 07 00 | info@profacto.dk | www.profacto.dk

## Set up System and Activation

The System Setup is defining how to process data during synchronization transactions. Please be aware, when setting the state to *Activated*, the Microbizz Connector is beginning the synchronizing process.

Set up every field in the System Setup group. **Wait setting “State” to Activated until all setup is completed. Please use the “On Hold” state until all setup is ready.**

Continue setting up all other setup pages. You will find these described on the next pages.

For more information see the *Microbizz Connector Manual*. This manual can be downloaded from ProFactos website [www.profacto.dk](http://www.profacto.dk).

## Job Queue

Codeunit 6208443 “MB Microbizz Synch. PROF” will be created and started when activating the State.

Status	User ID	Object Type to Run	Object ID to Run	Object Caption to Run	Description	Job Queue Category Code	User Session Started	Earliest Start Date/Time	Sche...	Rec... Job	No. of Minutes between Runs
Ready		Codeunit	6208443	MB MicroBizz Synch PROF	MicroBizz Synchronization			03-11-2022 10:26			5

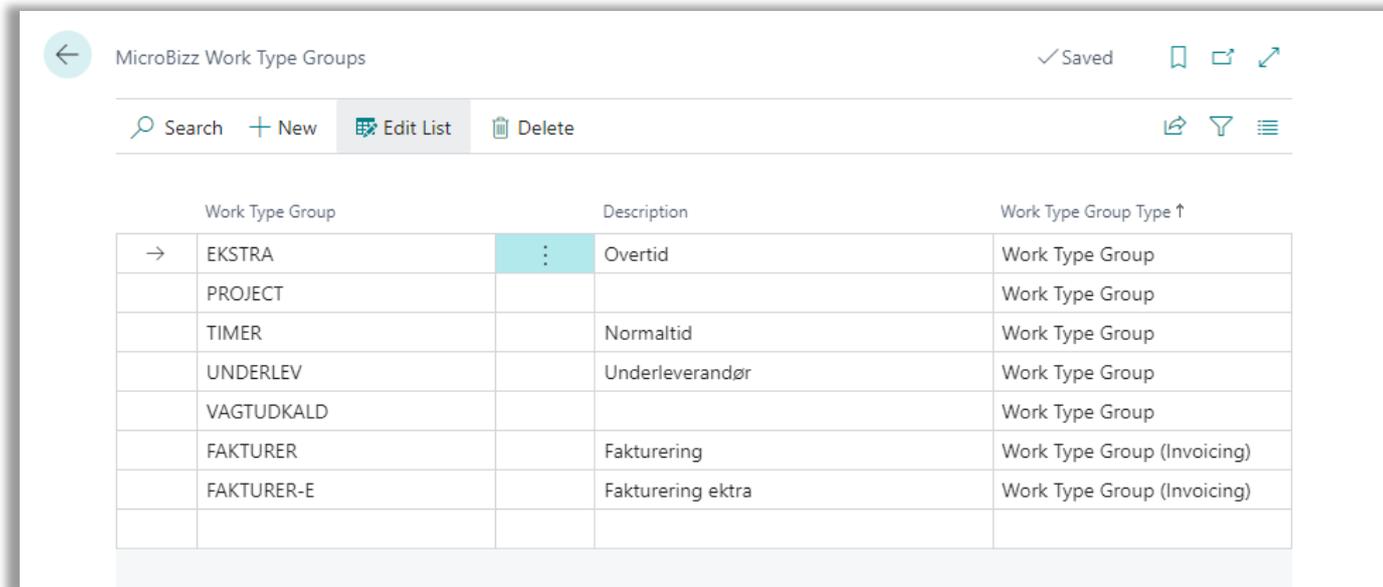

Default value for “No. of Minutes between Runs” is 5 minutes. This can be altered if so required or desired.

## MICROBIZZ WORK TYPE GROUPS

Set the type of Work Type Groups used by Microbizz and Business Central.

The screenshot shows the 'MicroBizz Work Type Groups' interface. At the top, there is a navigation bar with a back arrow, the title 'MicroBizz Work Type Groups', and a 'Saved' status. Below the navigation bar is a toolbar with 'Search', '+ New', 'Edit List', and 'Delete' buttons. The main area contains a table with the following columns: 'Work Type Group', 'Description', and 'Work Type Group Type ↑'. The table lists several work type groups, with the 'EKSTRA' group selected and its 'Work Type Group Type' set to 'Work Type Group'.

	Work Type Group	Description	Work Type Group Type ↑
→	EKSTRA	Overtid	Work Type Group
	PROJECT		Work Type Group
	TIMER	Normaltid	Work Type Group
	UNDERLEV	Underleverandør	Work Type Group
	VAGTUDKALD		Work Type Group
	FAKTURER	Fakturering	Work Type Group (Invoicing)
	FAKTURER-E	Fakturering ekstra	Work Type Group (Invoicing)

Select "Work Type Group Type" for every single Work Type Group. Setting up 'Work Type Group (Invoicing)' is optional.

Options are:

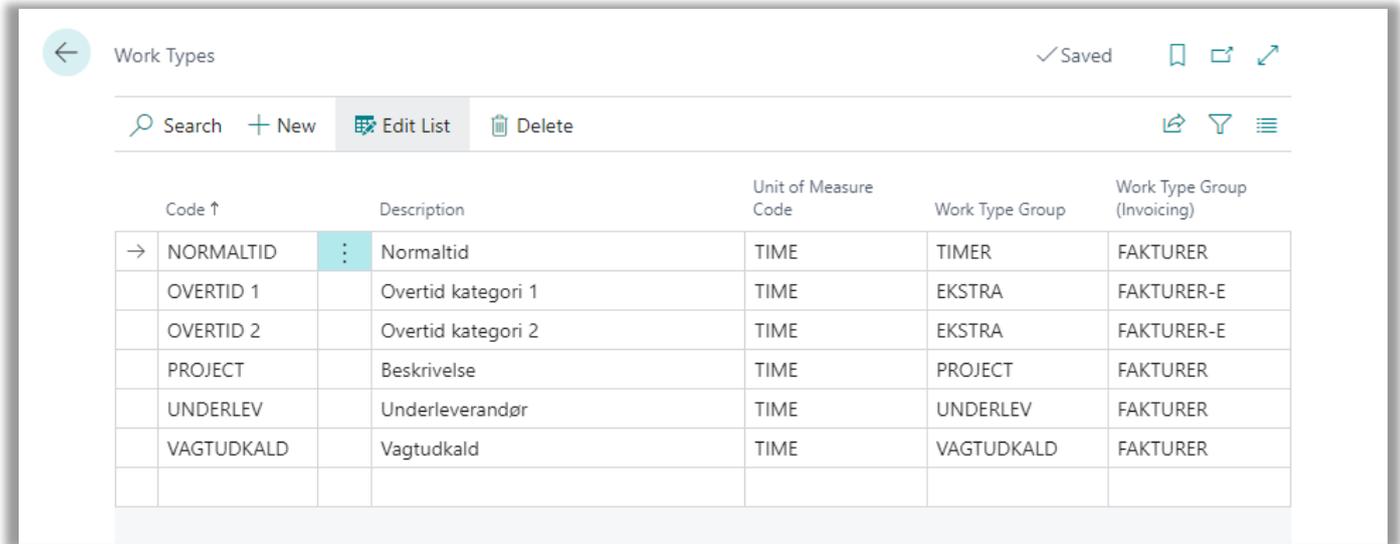

- *Work Type Group* - Normal usage, Job Ledger Entry with Line Type Billable.
- *Work Type Group (Invoicing)* - The Job Ledger Entries will be split in two. An Expense entry relevant for invoicing, Job Ledger Entry with "Line Type" *Billable*, and an entry with all information for production analysis, Job Ledger Entry with "Line Type" *blank*.
- *Both* - Usage of the Item Budget Area Group can be used for both categories.

### CONTACT INFORMATION

+45 31 31 07 00 | info@profacto.dk | www.profacto.dk

## WORK TYPES

Set up Work Types used by Microbizz and Business Central. Definitions of Work Type Groups must be completed for setting “Work Group Type” and “Work Group Type (Invoicing)” on this page.

Code ↑	Description	Unit of Measure Code	Work Type Group	Work Type Group (Invoicing)
→ NORMALTID	Normaltid	TIME	TIMER	FAKTURER
OVERTID 1	Overtid kategori 1	TIME	EKSTRA	FAKTURER-E
OVERTID 2	Overtid kategori 2	TIME	EKSTRA	FAKTURER-E
PROJECT	Beskrivelse	TIME	PROJECT	FAKTURER
UNDERLEV	Underleverandør	TIME	UNDERLEV	FAKTURER
VAGTUDKALD	Vagtudkald	TIME	VAGTUDKALD	FAKTURER

Set up fields “Unit of Measure Code” and “Work Type Group”. Use lookup for the selection. Field “Work Type Group (Invoicing)” is optional. Set the field if you want separate posting for invoicing

### CONTACT INFORMATION

+45 31 31 07 00 | info@profacto.dk | www.profacto.dk

## MICROBIZZ ITEM BUDGET AREA GROUPS

Mapping of Item Budget Area Groups used by Microbizz and Business Central is to be defined.

Item Budget Area Group	Description	Item Budget Area Group Type ↑
→ EKSTRA	Ekstra	Item Budget Area Group
MATERIALER	Materialer	Item Budget Area Group
FAKTURER	Fakturer	Item Budget Area Group (Invoi...
FAKTURER-E	Fakturer ekstra	Item Budget Area Group (Invoi...

Select “Item Budget Area Group” for every single Item Budget Area Group. Setting up ‘Item Budget Area Group (Invoicing)’ is optional.

Options are:

- *Item Budget Area Group* - Normal usage, Job Ledger Entry with Line Type Billable.
- *Item Budget Area Group (Invoicing)* - The Job Ledger Entries will be split in two. An Expense entry relevant for invoicing, Job Ledger Entry with “Line Type” *Billable*, and an entry with all information for production analysis, Job Ledger Entry with “Line Type” *blank*.
- *Both* - Usage of the Item Budget Area Group can be used for both categories.

## MICROBIZZ CUSTOMER TYPES

Customer Types are defining the type of company to be used when communicating with Microbizz.

Customer Type ↑	Description	MB Color Code	Type	Color
→ 1	Privat	#FF6600	Person	StandardAccent
2	Erhverv	#128f0f	Company	Strong
4	Underleverandør	#ca0cc3	Sub Vendor	StrongAccent
5	Leverandør	#00d1f0	Vendor	AttentionAccent
6	Offentlig	#cfd908	Public Authority	Standard

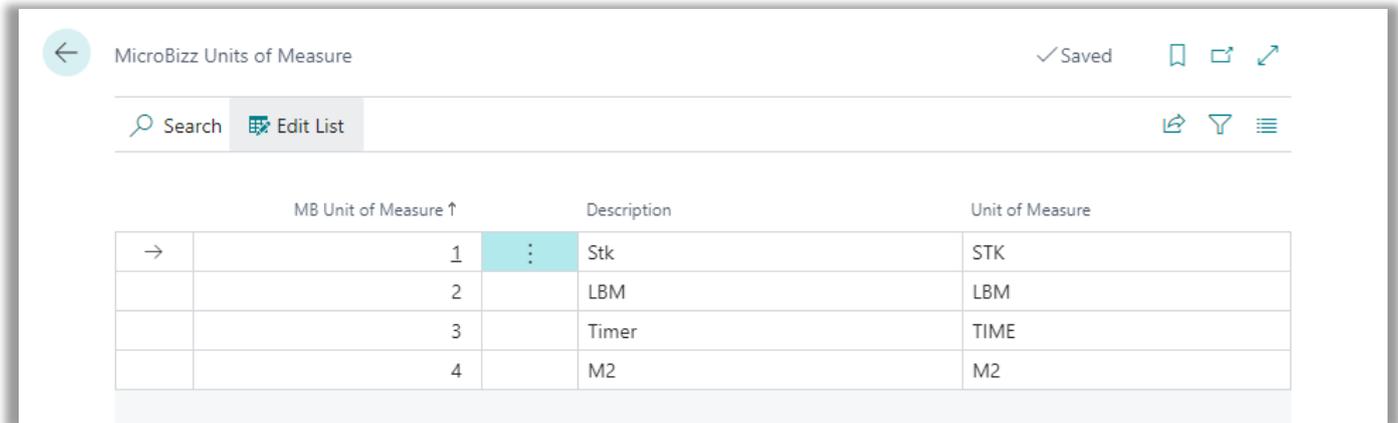

Set up field “Type” and choose Business Central style in field “Color” if you want other style than *Standard*.

+45 31 31 07 00 | info@profacto.dk | www.profacto.dk

## MICROBIZZ UNITS OF MEASURE

Mapping of Units of Measure used by Microbizz and Business Central is to be defined.

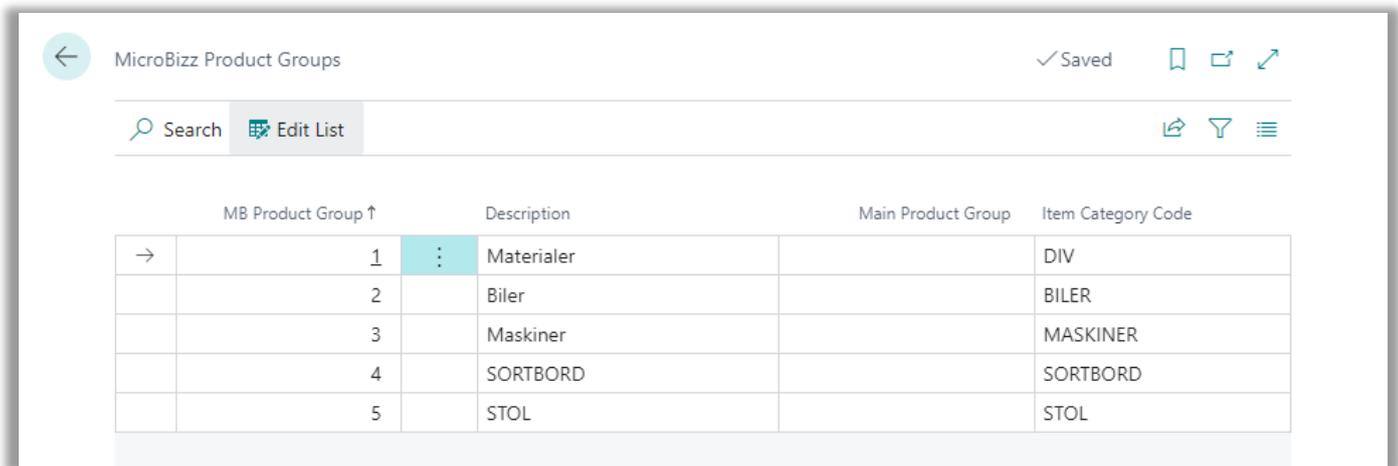

The screenshot shows the 'MicroBizz Units of Measure' configuration screen. It features a table with four columns: 'MB Unit of Measure ↑', 'Description', and 'Unit of Measure'. The table contains four rows of data. The first row is selected, and a menu icon is visible in the 'MB Unit of Measure' column.

	MB Unit of Measure ↑		Description	Unit of Measure
→	1	⋮	Stk	STK
	2		LBM	LBM
	3		Timer	TIME
	4		M2	M2

Set up field “Unit of Measure” with values used in Business Central.

## MICROBIZZ PRODUCT GROUPS

Mapping of Product Groups used by Microbizz and Business Central is to be defined.

The screenshot shows the 'MicroBizz Product Groups' configuration screen. It features a table with four columns: 'MB Product Group ↑', 'Description', 'Main Product Group', and 'Item Category Code'. The table contains five rows of data. The first row is selected, and a menu icon is visible in the 'MB Product Group' column.

	MB Product Group ↑		Description	Main Product Group	Item Category Code
→	1	⋮	Materialer		DIV
	2		Biler		BILER
	3		Maskiner		MASKINER
	4		SORTBORD		SORTBORD
	5		STOL		STOL

Define “Item Category Code” for each “MB Product Group”.

+45 31 31 07 00 | info@profacto.dk | www.profacto.dk

## MICROBIZZ ITEM STATUSES

Mapping of Item Statuses used by Microbizz and Business Central is defined.

Item Status ↑	Description	MB Color Code	Default Status	Show in App	Use in App	Color
1	Modtaget	#8fce00	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	StandardAccent
2	Retur givet - Afventer kr...	#ce7e00	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Attention
3	Kreditnota modtaget	#6a329f	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Unfavorable

Set “Color” for distinguishing between the types you can set one of the styles used within Business Central.

## MICROBIZZ ITEM BUDGET AREAS

Mapping of Item Budget Groups used by Microbizz and Business Central is to be defined. Setting up Item Budget Area Groups must be defined before the Item Budget Areas can be grouped.

Item Budget Area ↑	Description	Item Budget Area Group	Item Budget Area Group (Invoicing)	Not Selectable in BC
1	Materialer	MATERIALER	FAKTURER	<input type="checkbox"/>
2	Underleverandører			<input checked="" type="checkbox"/>
3	Ekstra	EKSTRA	FAKTURER-E	<input type="checkbox"/>

Please note that we can split the posting of Item Budget Areas in two parts.

Set mapping in fields “Item Budget Area Group” and “Item Budget Area Group (Invoicing)” from the list provided when looking up from the field. “Item Budget Area Group (Invoicing)” is optional.

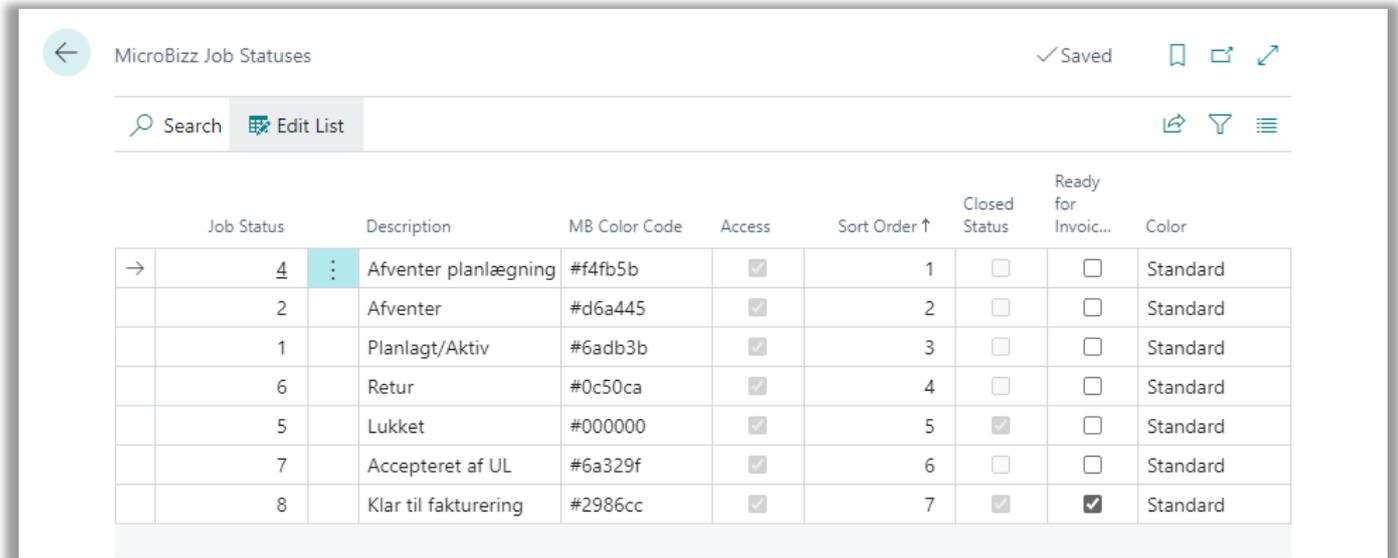

Mark “Not Selectable in BC” if not used in Business Central.

### CONTACT INFORMATION

 +45 31 31 07 00 | info@profacto.dk | www.profacto.dk

## MICROBIZZ JOB STATUSES

Mapping of Job Statuses used by Microbizz and Business Central is defined.

Job Status	Description	MB Color Code	Access	Sort Order ↑	Closed Status	Ready for Invoic...	Color
4	Afventer planlægning	#f4fb5b	<input checked="" type="checkbox"/>	1	<input type="checkbox"/>	<input type="checkbox"/>	Standard
2	Afventer	#d6a445	<input checked="" type="checkbox"/>	2	<input type="checkbox"/>	<input type="checkbox"/>	Standard
1	Planlagt/Aktiv	#6adb3b	<input checked="" type="checkbox"/>	3	<input type="checkbox"/>	<input type="checkbox"/>	Standard
6	Retur	#0c50ca	<input checked="" type="checkbox"/>	4	<input type="checkbox"/>	<input type="checkbox"/>	Standard
5	Lukket	#000000	<input checked="" type="checkbox"/>	5	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Standard
7	Accepteret af UL	#6a329f	<input checked="" type="checkbox"/>	6	<input type="checkbox"/>	<input type="checkbox"/>	Standard
8	Klar til fakturering	#2986cc	<input checked="" type="checkbox"/>	7	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Standard

Set the field “Ready for Invoicing” for the “Job Status” which is corresponding to *Ready for Invoicing*.  
For distinguishing between the types you can use one of the styles used within Business Central in the field “Color”.

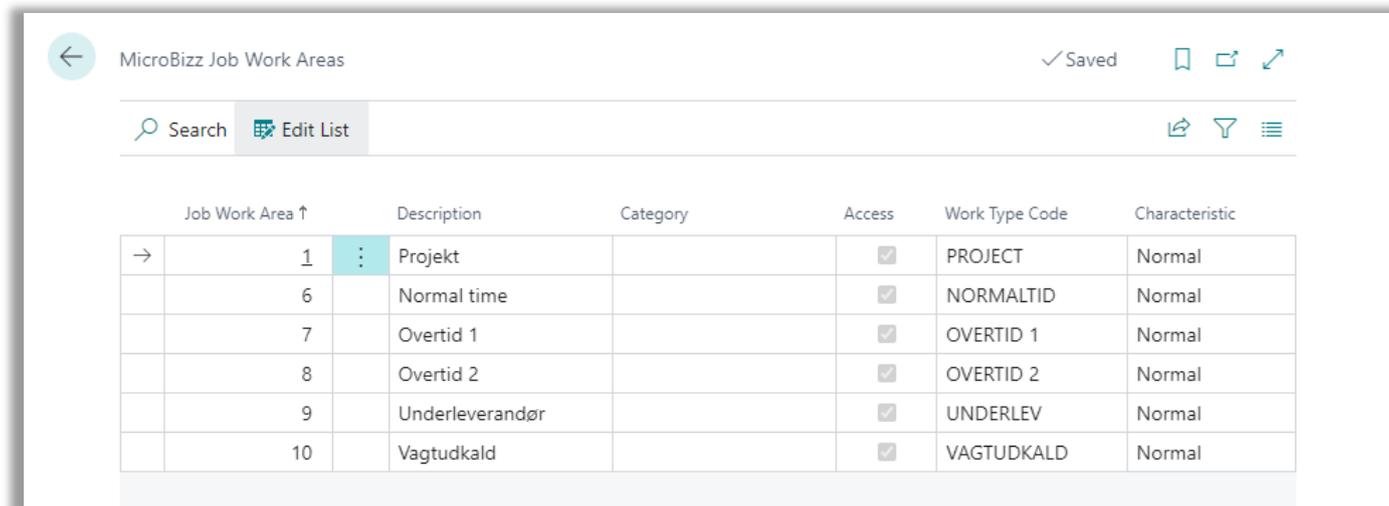

### CONTACT INFORMATION

ProFacto A/S | Lyfaparken | Måløv Byvej 229 G, 1 | DK-2760 Måløv  
+45 31 31 07 00 | info@profacto.dk | www.profacto.dk

## MICROBIZZ JOB WORK AREAS

---

Mapping of Job Work Areas used by Microbizz and Business Central is to be defined.

Job Work Area ↑	Description	Category	Access	Work Type Code	Characteristic
→ 1	Projekt		<input checked="" type="checkbox"/>	PROJECT	Normal
6	Normal time		<input checked="" type="checkbox"/>	NORMALTID	Normal
7	Overtid 1		<input checked="" type="checkbox"/>	OVERTID 1	Normal
8	Overtid 2		<input checked="" type="checkbox"/>	OVERTID 2	Normal
9	Underleverandør		<input checked="" type="checkbox"/>	UNDERLEV	Normal
10	Vagtudkald		<input checked="" type="checkbox"/>	VAGTUDKALD	Normal

Mapping “Microbizz Work Areas” with corresponding Business Central Work Types by setting field “Work Type Code”.

Characteristic must be defined as well. Options are:

- *Normal* - When Normal the job is ready to be synchronized with Business Central.
- *Quote* - The job exists only in Microbizz.
- *On Hold* - Option used for temporary setting the job on hold.

## VERIFYING SETUP AFTER COMPLETED SETUP

---

Now after the several pages of setup are completed, it would be a good idea running *Synchronize All Setup* from the Microbizz Setup page. Find the action button under *Actions, Microbizz*.

If no notices are revealed the setup should be completed.

---

### CONTACT INFORMATION

ProFacto A/S | Lyfaparken | Måløv Byvej 229 G, 1 | DK-2760 Måløv  
+45 31 31 07 00 | info@profacto.dk | www.profacto.dk

## SELECT DATA TO SYNCHRONIZE

---

What data to synchronize must be defined before any data are synchronized between Business Central and Microbizz.

Within the supported types, every single entity which are to be synchronized to Microbizz must be set up for synchronization. On the card pages you will find a field “Synchronize with Microbizz” which must be set to Yes if the record is to be synchronized.

Supported types are

- Jobs
- Customers
- Vendors
- Items
- Resources

The state of last performed synchronization will be visible on the card page after the synchronization is set.

### Synchronize with Microbizz

In each card page you can set the field “Synchronize with Microbizz”.

Options are:

- *Yes* - Synchronizing current record with Microbizz is activated.
- *No* - Record is not being synchronized with Microbizz.
- *Never* - Used when a decision of never synchronizing the record with Microbizz.

---

#### CONTACT INFORMATION

ProFacto A/S | Lyfaparken | Måløv Byvej 229 G, 1 | DK-2760 Måløv  
+45 31 31 07 00 | info@profacto.dk | www.profacto.dk

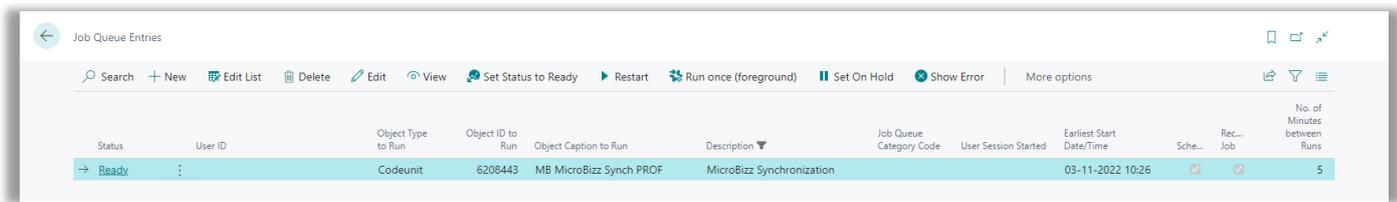

## JOB QUEUE

---

For handling the daily communication between Business Central and Microbizz, an entry in the job queue must be running.

As described in *Microbizz Setup* description, the job queue is initialized automatically then setting the “State” field to *Activated*.

Codeunit 6208443 “MB Microbizz Synch. PROF” is handling the communication between Business Central and Microbizz.

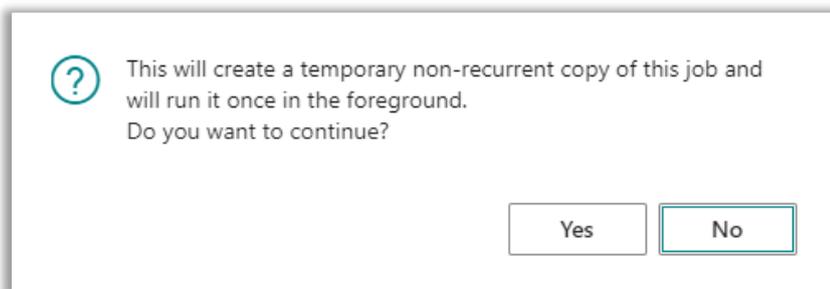

Status	User ID	Object Type to Run	Object ID to Run	Object Caption to Run	Description	Job Queue Category Code	User Session Started	Earliest Start Date/Time	Sche...	Rec... Job	No. of Minutes between Runs
→ Ready	:	Codeunit	6208443	MB MicroBizz Synch PROF	MicroBizz Synchronization			03-11-2022 10:26	☑	☑	5

Keep an eye on the status in the Job Queue Entries list. If the “Status” field has the Error indicator, please check the *Log Entries* for further information.

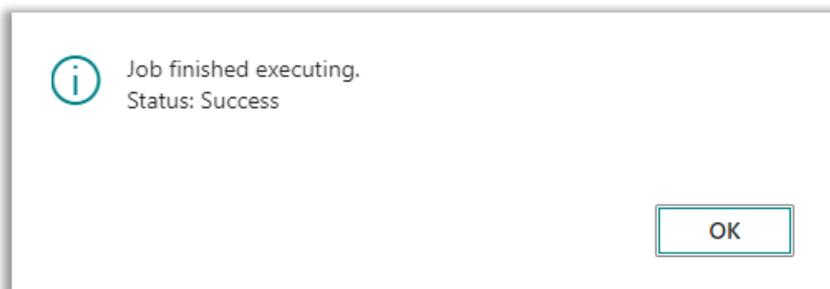

### Identifying problems

You can also run the job in the foreground for getting on screen messages to tell more about how the job is performing.

Click on the action button *Run once (foreground)* to run the job with visible error messages.

If the job is running successfully Status *Success* is reported.

---

# SURVEILLANCE OF SYNCHRONIZATION

From the *Microbizz Setup* page you will find the Synchronization Information. Here you can see when the different areas have been synchronized last time.

The screenshot shows the 'MicroBizz Setup' interface. At the top, there are navigation icons and a 'Saved' status. Below the title, there are tabs for 'Test Connection', 'Actions', 'Automate', and 'Fewer options'. The 'General' section includes a 'State' dropdown menu set to 'Activated' and an 'Item Entry Posting Delay (Minutes)' input field set to '15'. The 'Synchronization Information' section displays a table of synchronization events:

Synchronization Area	Last Synchronization Time
Microbizz BC Synchronized	03-11-22 10:47:07
Customer Types Synchronized	03-11-22 09:01:15
Units of Measure Synchronized	03-11-22 09:01:16
Product Groups Synchronized	03-11-22 09:01:16
Item Statuses Synchronized	03-11-22 09:01:16
Item Budget Areas Synchronized	03-11-22 09:01:17
Job Statuses Synchronized	03-11-22 09:01:17
Job Work Areas Synchronized	03-11-22 09:01:17

At the bottom, there is a link for 'System Setup >'.
